

CLEANING SOLUTIONS FROM KÄRCHER

HEAVY-DUTY SCRUBBER SWEEPER

B 300 RI

The B 300 RI is a diesel/gas-powered combi scrubber capable of sweeping and scrubbing within a variety of industries. With its 4-cylinder engine and working widths of up to 1750mm, large surfaces can also be cleaned quickly and thoroughly. The B 300 RI also includes 300 litre fresh and waste water tanks and a 180 litre waste container, allowing for extensive operating intervals.

(Please Note: This is a configurable machine, available in a range of different options, please contact us for more information)

Working Width: 1750mm
Surface Area: 16550m²/hr
Capacity: 300 litres

LARGE RIDE-ON SCRUBBER DRIER

B 250

The B 250 ride-on scrubber drier is designed for long periods of use in large facilities and features a roller brush with a 990mm working width and a 250 litre water tank, ideal for extended work intervals.

Its powerful 36V/650 Ah battery allows for prolonged use with minimal downtime, and thanks to the short wheelbase and the low device width, the machine impresses with its manoeuvrability and optimised area coverage, allowing even confined spaces to be cleaned thoroughly.

User-friendly EASY Operation switch and the intuitive color-coding enable extremely easy operation and the ecoefficiency mode allows for a 20% increased run time.

(Please Note: This is a configurable machine available in a range of different options, please contact us for more information)

Working Width: 990mm
Surface Area: Up to 8000 m²/hr
Capacity: 250 litres

RIDE-ON SCRUBBER DRIER

B 150

The compact B 150 is ideal for cleaning indoor areas and ensures you have a clear overview at all times. The battery-powered ride-on scrubber drier has a working width of 750mm or 900mm and is available with either a roller head including sweeping function or a disc head for smooth floors.

Brush head and squeegees lower automatically and include automatic adjustment of the contact pressure, adjustable cleaning modes and the KIK key system for added security. The auto-fill function allows automatic fresh water tank filling, as well as automatic dirty water tank rinsing for convenient dirty water tank cleaning.

(Please Note: This is a configurable machine available in a range of different options, please contact us for more information)

Working Width: 750mm / 900mm
Surface Area: Up to 5400 m²/hr
Capacity: 150 litres

RIDE-ON VACUUM SWEEPER

KM 105/100

The KM 105/100 features a host of new innovations that rewrite the rule book for ride-on sweepers. New concepts like the main brush position, operator-specific control system, eco!efficiency mode, Power Plus battery boost system and centrally-positioned side brush combine to make the KM 105 the most sophisticated sweeper available, ultimately resulting in lower running costs, increased safety and greater productivity. Available in battery, petrol, diesel and LPG, the KM 105/100 is completely configurable to suit any sweeping task.

(Please Note: This is a configurable machine, available in a range of different options, please contact us for more information)

Working Width: 640mm
Surface Area: 7350 m²/hr
Capacity: 110 litres

COMPACT RIDE-ON VACUUM SWEEPER

KM 90/60

The KM 90/60 is perfect for high performance outdoor cleaning with its user friendly, easy maintenance design. The machine is exceptionally agile and is very simple and comfortable to use. Ideal for cleaning various floor types including asphalt, pavements, concrete, hard floors and carpet. With an efficient Honda 4-stroke petrol engine, the machine offers area coverage of up to 7200m² per hour, a working width of 900mm as standard and a waste capacity of 60 litres, contained within two convenient, easy to empty drawer-type waste hoppers.

(Please Note: This is a configurable machine, available in a range of different options, please contact us for more information)

Working Width: 615mm
Surface Area: 7200 m²/hr
Capacity: 60 litres
